Bond-Pro® Enterprise NextGen®

A Monumental Leap Forward In Surety Technology

Newly engineered from the ground up, utilizing state-of-the-art, high performance technology and architecture: multi-tier scalable, fully web based, responsive, zero footprint client, services oriented architecture, and conforms with the latest information technology, security and compliance best practices.

Accessible By Anyone, From Anywhere, At Anytime

A streamlined, easy-to-use, web interface accessible anytime & anywhere by geographically dispersed executives, underwriters, CSRs, agents, direct principals, reinsurers, and obligees via an internet connection and a web browser.

Modern, Standards Compliant, Enterprise Interoperability

Services Oriented Architecture (SOA) that streamlines integration to other enterprise systems and supports data connections from multiple parties in multiple ways including Accounting, Claims, Policy, CRM, and Document Management Systems in addition to legacy/homegrown systems.

BOND-PRO

WEB PORTALS

Bond-Pro® Enterprise NextGen® (NG) enables seamless collaboration between

- Carrier Underwriters & CSRs
- Agencies & Agents
- Direct Principals / Contractors
- Reinsurers & Obligees

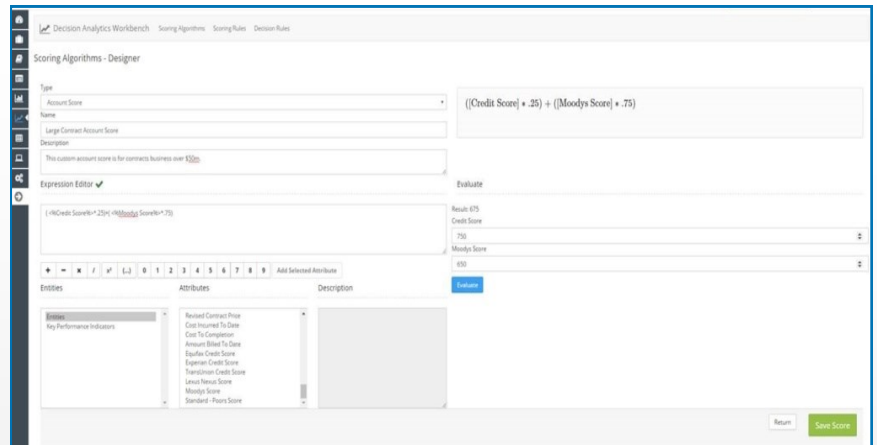

B2B SURETY HUB™

Bond-Pro® NG is the first phase of the Bond-Pro® B2B Surety Hub™ which will enable agencies to directly pass data transactions from within their surety agency systems to Bond-Pro® NG carrier customers instantaneously

- Provide Instantaneous Decisions
- Eliminate Arduous Dual Entry
- Attract More Agents
- Reduce Cost & Risk

“Bond-Pro is the only vendor to offer a full suite (including bond management, claims and billing) designed specifically for the surety market.”

Gartner

Introducing Surety Analytics™

Configurable financial formulas & ratios enabling close conformity with established underwriting guidelines and the capture & incorporation of wisdom. Bond-Pro® NG's plug-in infrastructure enables data connectors to be easily implemented that automatically gather information from multiple sources including credit agencies, industry related organizations, government, and/or your Enterprise Services Bus.

Scoring & Automated Decision Making

Completely automate the underwriting, processing, delivery and payment of thousands of bond types based on credit scores, financials, and industry risk profiles. Our patent pending configuration system allows sureties to efficiently build and modify automated underwriting rules, as well as automate incentive programs based on an array of factors to drive incremental premiums.

Highly Configurable Workflow, Alerts & Notifications

Bond-Pro® Enterprise NextGen® includes a visual, workflow engine intended for authorized, non-technical users, that reliably facilitates automated decision making & issuance, business process management & enforcement, triggering of scheduled jobs, tasks, alerts and notifications.

Powerful Dashboards & Insightful KPIs

Graphical dashboards that present key performance indicators (KPIs) all from one place. Allows business users to quickly and accurately determine account metrics and operational efficiency goals.
